CONSULTANT QUESTIONS

- Q1: "As we read the description, all key staff are to have expertise in environmental permitting as well as experience in either wetland design or stream restoration design. Our understanding of the contract is that the majority of the work is for TMDL related design. Engineers with expertise in TMDL are more familiar with stormwater management, and the majority do not have any experience in either wetland design or stream restoration design. If the majority of the work is for TMDL design, why is there no requirement for any of the key staff to have expertise in TMDL design?"
- A2: **Per the Project Description on Page 3: This contract is to provide a full range of environmental design and permitting services, including but not limited to planning, preliminary and final engineering/landscape architectural design services, permitting and compliance for SHA's capital and maintenance programs, statewide.**

General questions relating to this Addendum No. 1 may be directed to opcm@sha.state.md.us. The time period for questions has expired; therefore no additional questions will be accepted or answered by SHA.
